

Project overview

fact sheet

Summer 2021

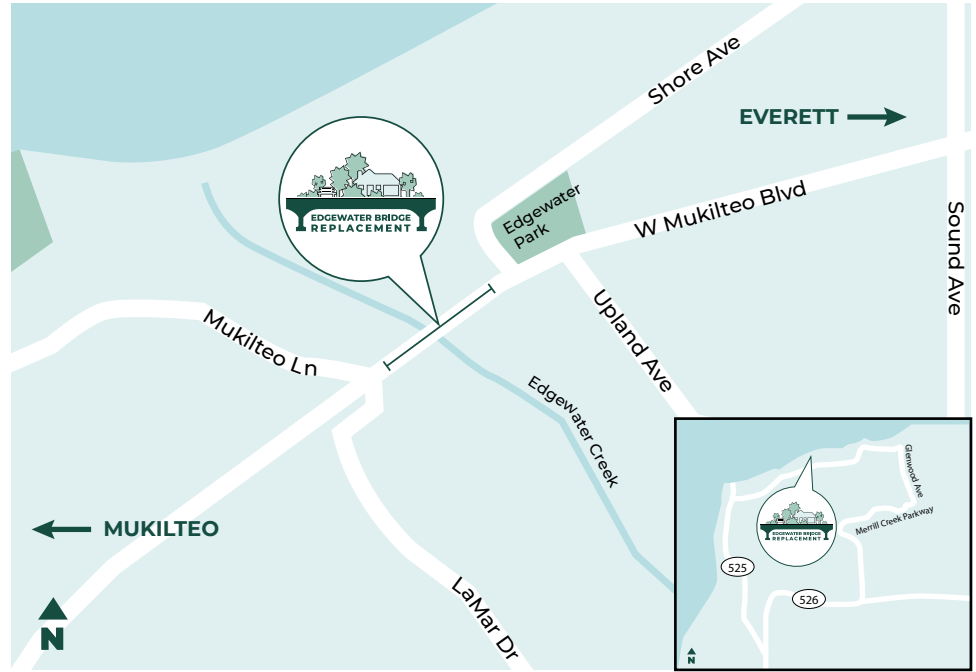

Why does the Edgewater Bridge need replacing?

The Edgewater Bridge carries W Mukilteo Blvd across Edgewater Creek at the western limits of Everett. The road is an important arterial for the Boulevard Bluffs neighborhood, and the bridge is used daily by nearby residents, transit, ferry traffic, school buses and emergency responders.

The current bridge was built in 1946 and is at the end of its useful life. While safe for daily use, it is functionally obsolete, structurally deficient, and currently operates under load restrictions. It is also seismically vulnerable – if two of the three bridges along W Mukilteo Blvd were lost in a major earthquake, nearby neighborhoods could be isolated.

We are focusing on this bridge and the recently completed Maple Heights Bridge as part of our earthquake hazard mitigation efforts. Building a new bridge is a long-term investment in our transportation system, providing for the safety of everyone using W Mukilteo Blvd.

Project map

Project details

New bridge features

- Built to modern seismic safety standards
- One 12-foot vehicle lane and one 5-foot bike lane in each direction
- 6.5-foot sidewalks (wider than the existing sidewalks)
- Three-span bridge featuring railing, lighting and gateway features informed by community input

Estimated budget of \$22 million:

- \$12 million Federal Bridge program grant funding
- \$5.5 million City of Everett Bond
- \$4.5 million City transportation funds

Project timeline

Summer 2021

Bridge design is nearly complete, and construction is planned to start in spring 2022. Construction is being coordinated with other nearby projects. The bridge will be fully closed for approximately 12 months starting in June 2022, after school is out. Construction is expected to finish in summer 2023, weather and other factors permitting.

Plan for detours during full bridge closure in 2022-2023

Construction will require us to close the Edgewater Bridge for approximately 12 months, beginning after the school year ends in June 2022. This will affect travel routes and require detours. Everett Transit will redirect service from Mukilteo to Everett thru Seaway Transit Center, where customers may transfer to the most direct service to either downtown Everett or Everett Station. Everett Transit will not provide fixed route service on Mukilteo Blvd between Dogwood and SR 525, however, para transit services will continue to be provided as needed.
